## ACCELERATES CASH COLLECTION

The Hilniva AR solution provides both internal AR professionals and customer's AP professionals with an interactive collaboration environment that enables sharing of invoices, credit memos, and other related documents and communication over the web.

By integrating the relevant documents and invoices chronologically with the complete communications history, Hilniva AR allows management and department staffs to easily and expeditiously resolve any issues and disputes related to the invoices. Further, with Hilniva AR's communications and information capabilities, any business will reduce DSO, minimize bad debt, optimize cash flow, and avoid the time delays associated with dealing with different AR and AP personnel.

**Make a big difference  
in YOUR  
bottom line**

## PLUG AND PLAY SOLUTION

The Hilniva AR solution is a cloud-based software service. It easily integrates into an existing ERP system with a supplied connector, and eliminates costs of infrastructure and software licenses as there are no additional servers and software required.

## ASSURES COMPLIANCE

The Hilniva AR solution automatically archives all communication and shared documents chronologically per invoice in a secured environment. It also reduces time and cost spent on retrieving information.

This function makes compliance of SOX, GAAP and IRS regulation very manageable.

## IMPROVES OPERATING EFFICIENCY

The Hilniva AR solution streamlines communication between both AR and AP professionals by eliminating manual paper handling such as re-sending a lost invoice via fax, and managing all communication and shared documents. Since the Hilniva AR solution enables sharing and archiving of related communication and documents, users do not need to sort and store paper documents, send paper invoices or archive email communications. By automating this process, AR and AP professionals are better able to focus on their core business, collection, and increase productivity by more than 20%.

## EASY AND QUICK DEPLOYMENT

Seamless integration with major ERP solutions such as SAP, PeopleSoft and Oracle.

Supports frequently used office document formats (XLS,DOC,TIF,PDF etc.) with industry standard encryption methodology.

1

**Sales / Revenue**  
Receivable

2

**Lengthy resolution of disputes**  
Lost information and documents.  
Scattered emails.  
Inefficient processes.  
Non compliance.

3
